

# Accelerating a transformation in climate science and services for health

WORLD METEOROLOGICAL ORGANIZATION

This initiative aims to improve global health outcomes by mobilizing a network of resources and actors to scale up climate science and services that inform health decision-making.

**OCTOBER 2025 - SEPTEMBER 2027**

**11.6M**  **US\$**

**INVESTMENT**

Strengthen multidisciplinary capacity and partnerships to address extreme heat risks, particularly for vulnerable populations in low- and middle-income countries (LMIC).

**GLOBAL COVERAGE**

**OUTPUTS**

- Global Community and Capacity Building
- Strengthening Regional Heat Health Capacity
- Synthesis and Translation of Evidence to Action
- Heat Health Advocacy, Uptake, and Outreach
- Enhanced climate services for vector-borne diseases and other health impacts

**FOCUS AREAS**

**Service Delivery**

**Early Warning**
