

Climate-Resilient Development Pathways in Metropolitan Regions of Europe (CARMINE)

WORLD
METEOROLOGICAL
ORGANIZATION

The CARMINE project will bolster the resilience of European metropolitan communities to climate change.

**FEBRUARY 2024 -
JANUARY 2028**

CARMINE aims to strengthen climate resilience in European metropolitan regions by enabling evidence-based, multi-level decision-making for adaptation and mitigation in the context of increasing climate extremes.

FOCUS AREAS

**Early
Warning**

€587K *

FUNDING DESIGNATED TO WMO

8

CASE STUDY COUNTRIES

Czechia, Denmark, Germany, Greece, Italy, Romania, Spain, United Kingdom of Great Britain and Northern Ireland

OUTPUTS

- Co-created and co-developed decision-support services and guidelines for enhanced resilience and adaptive capacity, including early warning and disaster risk management systems
- Co-developed cross-sectoral frameworks for adaptation and mitigation actions
- Science-based R&I roadmaps for multi-level climate governance supporting local adaptation assessments and plans

*FUNDED BY THE EUROPEAN UNION UNDER HORIZON EUROPE GRANT AGREEMENT NO. 101137851 - TOTAL PROJECT BUDGET: €10 MILLION
